

No.	Risk	Impact-description	Likely	Impact	Response plan
R1	Project delay	Unable to develop our website, deploy on time.	EH	M	Carefully plan, make a good bug triage and test carefully.
R2	Not meet to the quality standards.	Unable to deliver, repeating development and cause project delay	M	EH	Software Quality Assurance, test during the coding and make sure there's no bug.
R3	Requirements change	Repeating development, cost increase and cause project delay	H	H	Analysis requirements carefully, use incremental development, keep contacting with stakeholders
R4	Over budget	Unable to deliver the project, must spend time to raise more money	L	M	Estimate cost carefully and control the budget real time.
R5	Staff absence or changes during the development	May cause project delay and low quality work and increase the cost	EL	M	Estimate the workload carefully, assign work reasonably and make an efficient team management.
R6	Not meet the functional requirements	Must do additional developments and cause the project delay	EL	EH	Design the project carefully to ensure the design of each functional point is completed.
